

SITE PLAN

Site Description

The main purpose of this website is that whether they are couples, families and even workers who work in the temple they can find all the comforts they need to be comfortable during their visit to different towns, that is why this website will give them an idea clearer of what they can find in each hotel and how they meet their needs in order to make every moment they have during their visit to a temple even more memorable.

Site name

The name of the website will be Temple Inn & Suites, which represents a clear and easy way for the user to know the purpose of the site.

Target Audience and Scenarios

Personas

- **Monica and Chandler**

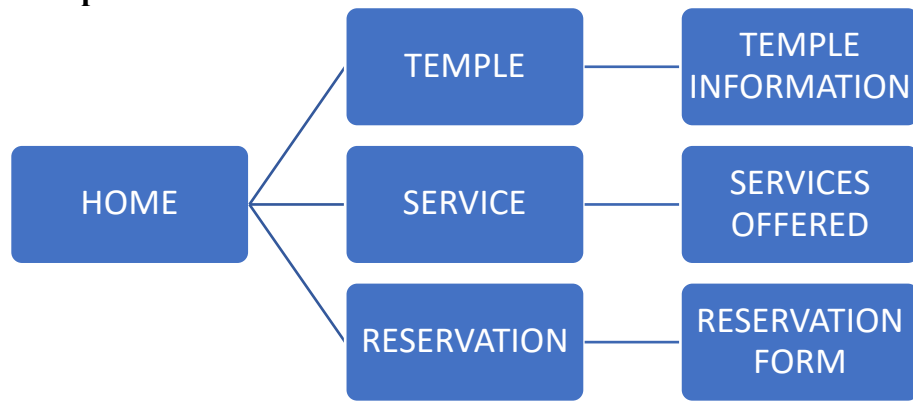

This couple of newlyweds want to unite their relationship for this life and for eternity, hence, they wanted to be able to perform their sealing in a temple, since a temple for them is not close, one of the nuptial rooms would be perfect for them to be together. Additionally, they wish to hold a small family reunion to be able to share this special moment with those they consider their closest family.

- **Tanner family**

The Tanner family wants to make a small tour to visit a temple outside the city where they live, their family is numerous and they even have a pet, that is why one of our apartments is perfect for their stay so that they feel that they are together, additionally while their parents are in a session the children can have fun either in the pool or in the different rooms designed for them.
